Due to class size restrictions in our district, there is a possibility that we will reassign your child to another class or another school within our district. To provide consistency and stability in your child's educational program, the assignment may be for one year or longer if conditions persist. We usually provide transportation to and from school for students who are reassigned due to crowding. We base our decision to reassign students on several factors as listed below.

- 1) **Class Size:** State law and teacher contract limit the number of students permitted per class.
 - a) 24 student maximum in grades K – 3
 - b) 30 student maximum in grades 4 - 6
- 2) **Student Balance:** All classes have a variety of ability levels.
- 3) **Number of Students at Each Grade Level:** When students arrive in numbers that do not divide into classes of appropriate size, decisions must be made to combine two grades, transport students or find another solution. In cases of overcrowding, students may be transported to another district school.
- 4) **Special Programs:** State and Federal laws limit the number of students permitted per special education teacher.

Our goal is to provide a quality educational program for your child and for all students served by our district. Your cooperation and understanding is appreciated.

My signature below acknowledges that I am aware that overcrowding may occur and my child may be reassigned to another class or school based on the above criteria.
